GREENVILLE NEWS.

Prof. Henry A. Tirrell Talks on New Charter—Notes and Personal.

In spite of the stormy weather Wednesday evening there was a good sized crowd present in the basement of St. Mary's church to hear the talk on the new charter given by Prof. Henry A. Tirrell, president of the committee on the new charter.

Prof. Tirrell, who is a member of the committee on the new charter, introduced the subject in a brief and comprehensive manner.

He spoke for about an hour, explaining the principles and ideas of the charter in a clear and concise manner.

The speaker left the audience with the impression that the commission had done its work in a non-partisan way and with a desire to serve the citizens.

Copies of the proposed charter were distributed and a rising vote of thanks was extended to Prof. Tirrell.

## INDUSTRIAL CENSUS OF NORWICH

Summary for 1909 Shows Big Gains Over 1904, Every Item Showing Increase—New London not so Fortunate, But Willimantic Does Well.

A preliminary statement of the general results of the census of manufactures of the city of Norwich has been issued Wednesday by Acting Census Director Falkner. It contains a summary comparing the figures for 1904 and 1909, by city totals, prepared under the direction of William M. Stearns, chief statistician for manufactures, bureau of census. The figures are subject to such revision as may be necessary after a further examination of the original reports.

The summary shows increases in every item as follows: 53 per cent. in the value of products, 44 per cent. in the value added by manufacture, 45 per cent. in the value of materials, 54 per cent. in the salaries and wages, 21 per cent. in the average number of wage earners employed during the year, 25 per cent. in the number of establishments, 8 per cent. in the number of salaried officials and clerks, and 5 per cent. in the number of establishments.

There were 91 establishments in 1909, as compared with 87 in 1904, an increase of 4 or 5 per cent.

The value of products in 1909 was \$2,335,000, as compared with \$1,522,000 in 1904, an increase of \$813,000, or 53 per cent.

The average per establishment was approximately \$25,648 in 1909, and about \$17,378 in 1904.

The value of products represents their selling value or price at the plants, as actually turned out by the factories during the census year, and does not necessarily have any relation to the amount of sales for that year. The values under this head also include the amount received for work done on materials furnished by others.

Decrease at New London.

A preliminary statement of the general results of the census of manufactures of the city of New London contains a summary comparing the figures for 1904 and 1909, by city totals.

The summary shows increases in four and decreases in five items. The increases are: 26 per cent. in the number of establishments, 19 per cent. in the value of products, 13 per cent. in the value added by manufacture, 10 per cent. in the salaries and wages, 8 per cent. in the value of materials.

There were 106 establishments in 1909, as compared with 104 in 1904, an increase of 2 or 3 per cent.

The value of products in 1909 was \$1,483,000, as compared with \$1,278,000 in 1904, an increase of \$205,000, or 16 per cent.

The average per establishment was approximately \$14,000 in 1909 and about \$12,300 in 1904.

The value of products represents their selling value or price at the plants, as actually turned out by the factories during the census year, and does not necessarily have any relation to the amount of sales for that year. The values under this head also include the amount received for work done on materials furnished by others.
